

Friamat Fusion Machines

Generators with 16amp capability to buy or hire

Friatec recommend a 5kva generator for
EF Welds 20d-900d

In accordance with Electrical regulations Friatec have changed plugs from 10amp to 16amp.

Below we have suggested some companies that sell and Hire Honda Generators recommended for the purpose of EF Welding and are, or can be, fitted with 16amp outlets.

Friatec are not supporting the mentioned retailers but from our research they are able to provide a solution that fits the purpose in New Zealand.
